**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 February 2007.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Claims 1-7 in the reply filed on 2/23/07 is acknowledged.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wan US 5354359 in view of Elmore US 4721526.**

Wan teaches a process of thiosulfate heap leaching in the presence of oxygen (See Column 10 Lines 50-62). The pH of the least liquor is about 9 (Column 7 Line 61), and has a ammonia content of at least 0.05 M (Column 7 Line 56). The copper content of the leach liquor is about 20 ppm (Column 7 Line 67).

Wan does not expressly state that molecular oxygen at a pressure greater than its ambient atmospheric pressure is introduced counter-currently by a network of conduits through the heap.

Elmore teaches a heap leaching process wherein molecular oxygen at a pressure greater than its ambient atmospheric pressure is introduced counter-currently by a network of conduits through the heap (See Figures 1 and 3).

At the time of invention it would have been obvious to form the process of Wan to include molecular oxygen at a pressure greater than its ambient atmospheric pressure is introduced counter-currently by a network of conduits through the heap in view of the teaching of Elmore. The suggestion or motivation would have been to provide of means of increasing the oxygen content in the lixiviant solution of Wan (Wan Column 10 Lines 59-61).

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Fiorito whose telephone number is (571)272-7426. The examiner can normally be reached on 9am - 6pm.
